26 November 1973

NASA Lyndon B. Johnson Space Center  
Earth Observations Division  
Attn: Mr. Zack H. Byrns, Mail Code TF6  
Houston, TX 77058

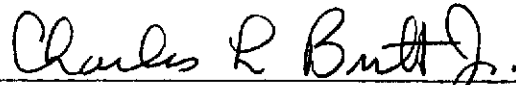

Subject: Contract NAS9-13304 Monthly Progress Report for the Period  
1 October - 31 October 1973

Program activity has been minimal during this month, pending NASA  
action on the proposed change in Principal Investigators.

On 10 October 1973, a visit was made to RTI by the Technical  
Monitor, Mr. Byrns, and several discussions were held concerning the  
current status and plans for completion of the program.

On 24 October, a visit was made to Messrs. McGoogan and Stanley  
at NASA Wallops Station to discuss future program coordination. Drs. Wortman  
and Britt and Mr. Ruedger from RTI attended this meeting. Mr. McGoogan  
indicated that he is not expecting further model development from RTI and  
agreed to provide RTI with data corrected and calibrated by the models  
previously generated.

No charges were made to the program during the month of October.  
A financial report for this period is included as Appendix A.

Charles L. Britt, Jr., Ph.D.  
Acting Principal Investigator
